

The tanks are suitable as containers for clean or service water under atmospheric pressure. They are lightweight, storable and easy to handle.

Construction characteristic

- made of high-density non-toxic linear polyethylene
- have a monolithic construction without critical points

Usage

- are suitable as reservoirs of pure or service water under atmospheric pressure

Technical parameters

- are resistant to UV radiation, algae formation, temperature fluctuations, impact and chemicals
- resistant to temperatures up to 60°C
- they can be easily cleaned with conventional cleaning agents
- they are light, storable and easy to handle

Type:	N 2000
P dimensions:	670 mm
L dimensions - lenght:	2210 mm
H dimensions - height:	1740 mm
W dimensions - width:	670 mm
A dimensions:	1590 mm
B dimensions:	40 mm
C dimensions:	60 mm
E dimensions:	405 mm
F dimensions:	490 mm
Inlet connection:	1"
Tank volume:	2000 l
Inlet size:	405 mm
