

# BILLY SKIMMER

## Skimmer

Fixed skimmer with a floating collection basket that automatically adjusts to the water level in the pond. Easy installation using a telescopic pipe, suitable for already finished ponds with a surface area of up to 40 m<sup>2</sup>. Adjustable height range from 42 to 85 cm. It minimally disrupts the appearance of the pond. When used together with the recommended CARETA pump with dual suction, the surface of your pond will always look like a mirror. Cleaning is simple — just empty the collection basket and occasionally rinse the fine mesh filter.

## Construction characteristics

- telescopic pipe
- collection basket with filter sponge, capacity approx. 6 L
- suitable for water depths of approx. 40 to 85 cm

## Usage

- utility or pond water
- maximum water temperature 35 °C
- recommended feed pump: CARETA

## Applications

- collects debris (e.g. leaves) from the pond surface
- helps prevent pond freezing during winter

## Technical parameters

TYPE	BILLY SKIMMER
Recommended pump flow rate	4500 l/h
Pond	up to 40 m <sup>2</sup>
Connection	3/4" - 6/4"
Weight	2 kg
