

UNDERGROUND TANKS AND RESERVOIRS - VERTICAL VZ 1680

Underground vertical polyethylene tanks designed to store clean or service water at atmospheric pressure. Their biggest advantage is the installation without the need for concreting (they are installed directly into the excavation).

Type:	VZ 1680
Weight:	70 kg
H dimensions - height:	1445 mm
De:	1400 mm
W dimensions - width:	1400 mm
A dimensions:	410 mm
B dimensions:	310 mm
Tank volume:	1680 l
Montage dimension A:	410 mm
Montage dimension B:	310 mm
