

### Construction characteristic

---

- pump alternation or simultaneous operation as required
- dry running protection
- timer function (adjustable from 0 to 180 ")
- pumps controlled by two frequency converters with adjustable calibration

### Motor

---

- economical motor IE 3

### Usage

---

- overpressure systems
- cleaning systems
- hotels, guesthouses, small and medium-sized manufacturing plants, car washes, apartment buildings ...

### Aplikace

---

- the advantage is significant energy savings
- extending pump life via rotation

### Technical parameters

---

- maximum flow 21 m<sup>3</sup>/h
- max. height 70 m
- max. working pressure 8 bar
- degree of protection IP 55
- maximum liquid temperature 40°C
